first choice organic fruit vegetable

Ariza is specialized in the production of fruit and vegetable ingredients. We are a family owned manufacturer with more than 30 years of experience in the international organic juice industry by producing and supplying NFC juices, purees and concentrated juices in organic and baby food grade. We supply over 50 organic fruit and vegetable products directly from stock to our broad customer base. More than 160.000 tons of organic fruit and vegetable is being handled by Ariza every year. The aim is to supply fresh and fruitful ingredients that give the right taste and color to your products.

Çivril, Türkiye

In Çivril, Türkiye one of our production facilities (Arisu) is located. Çivril is one of the best geographical areas in Türkiye to grow fruits and vegetables such as apple, peach and pomegranate. Arisu is a modern state-of-the-art production location using latest technologies in fruit juice processing. The local team manages and controls the organic farming projects.

Headquarter in The Netherlands

At the headquarter in The Netherlands Ariza has blending, packaging and crushing facilities, cold storage, storage tanks, laboratory and a NPD department. Product safety is guaranteed by full chain control and secured by full analyses.

Ariza is the pioneer in the production of organic concentrated juices, NFC juices and purees. Like no other, we know the endless possibilities of our products. In our way of working, Ariza is not only a supplier of your high quality raw materials but we can also provide you with unique concepts and solutions.

NFC Juices | Purees Juice concentrates

Usage

Our products are ideal to use in the beverage, dairy, confectionary, bakery, pastry and ice cream industries. Ariza aims to supply fresh and fruitful ingredients that give an extra rich taste and color to your products.

NFC Juices

While producing NFC juices, Ariza aims to retain as much of the character of the initial fruit as possible. At our factory, we press our ripe crop, no water is added or removed in the production process.

Purees

Ariza produces fresh and fruitful single strength purees that give the right taste, color and mouth feel to your products. We have various single strength purees in our portfolio from different countries of origin. We have our own blending facilities, enabling us to supply tailor-made puree blends.

Juice concentrates

Our aim is to supply fresh and fruitful juice concentrates that give the right taste and color to your products. At our factory, the concentrate is obtained by pressing the fresh fruit, followed by filtering. Then the juice is concentrated by evaporating the water. As a specialist in this area, we have a wide range of concentrates in our portfolio from low to high acidity, from clear to cloudy. Ariza owns two storage facilities which gives the flexibility to keep all organic fruit and vegetable NFC juices, purees and juice concentrates in stock year round. Our blending facilities enable us to supply tailor-made blends upon request.

| FRUITFUL BY NATURE

Concepts.

Do you have an idea for a new organic drink and are you looking for a partner to turn it into a new and delicious product? Our NPD team can design organic concepts that will give you a competitive edge. We turn the latest trends into tasty beverages of the highest quality.
